CURRENT LEARNING

Beginner iOS Developer Learning Path - Dicoding **2026 – Present**

- Getting Started with Swift Programming (Memulai Pemrograman Dengan Swift)
- Fundamentals of Mobile App Development (Belajar Dasar Pengembangan Aplikasi Mobile)
- Building iOS Apps for Beginners (Belajar Membuat Aplikasi iOS untuk Pemula)

WORK & PROFESSIONAL EXPERIENCE

PT Greenfield Work and Flow - Bali, Indonesia **November 2024 – April 2025**
Student Staff – Bookkeeping Assistant

- Managed administrative and bookkeeping operations, maintaining accurate employee and payroll documentation.
- Identified manual payroll inefficiencies and developed an automated payslip system using Google Apps Script & Google Sheets, significantly reducing manual data-entry workload.
- Structured data workflows to ensure zero-discrepancy compensation distribution across the team.

PT Teknologi Arcom Mediaksa - Bali, Indonesia **2023**
IT & Digital Operations Intern

- Maintained product inventory and pricing databases to support seamless daily commercial operations.
- Collaborated on promotional and digital design assets while organizing technical operational documentation.
- Applied software and digital competencies to streamline team workflows in a professional tech environment.

- Delivered direct customer service in a high-volume setting, serving diverse domestic and international clients.
- Handled POS order processing, cash/digital transactions, and operational tasks with high precision.
- Resolved customer inquiries under pressure through active listening, empathy, and effective communication.

SELECTED PROJECTS

Automated Payroll Slip System - Indonesia

2025

Tech Stack: Google Apps Script, Google Sheets, JavaScript

- Identified a repetitive manual process in payroll administration and engineered an automated solution.
- Built a system linking structured payroll spreadsheets to dynamic, individual payslip generation.
- Connected Google Sheets with Google Apps Script for automated document generation and email distribution.
- Reduced repetitive manual work and helped minimize calculation errors, making recurring payroll administration easier to manage.

SIPATAN – Agricultural & Food Security Information System - Indonesia

2026

Tech Stack: PHP Native, MySQL/MariaDB, HTML, CSS, Bootstrap, AdminLTE, Laragon

- Designed workflows for Admin, Farmer, and Head of Department user roles.
- Developed management features for farmer, land, commodity, and harvest data.
- Implemented harvest verification and reporting workflows.
- Designed database structures, ERD, UML, and system interactions.

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

- **Member, SYNTAX Public Speaking (ITB STIKOM Bali)** | 2026 – Present: Actively train in impromptu speaking, vocal control, structured argumentation, and team presentation dynamics.
- **Committee Member, Campus Seminar (ITB STIKOM Bali)** | 2026: Handled operational logistics, rundown coordination, and participant administration for a university seminar.
- **Volunteer Referee, PORJAR Bali** | 2026: Officiated regional student Gateball matches, enforcing competition rules, fair play, and rapid on-field decision-making.
- **Competitive Gateball Athlete** | 2022 – Present: Competed in provincial tournaments, maintaining rigorous tactical training, strategic planning, and teamwork under pressure.
